

**flowers &
chocolates**

Karilá

Karilá creates special flowers for special people. In our product range are many delightful fusions of flowers and chocolate. All our products are handmade, created with personal care on each. Karila flowers are the most perfect present – it is a flower, which does not wither, instead it has a sweet ending. We get our inspiration from the sweetness of chocolate and from the nature itself.

The chocolate flowers are handmade, each one of a kind. Our flowers are all edible: stalk of white or dark chocolate and blossom of modelling chocolate. We season blossom with organic pastes of berries and fruits, which also carry qualities of antioxidants. They are also coloured as natural, as chocolate can take: chlorophyll, curcumin, riboflavin, carmine, brilliant blue and herbal blue.
